Elberton Mayor Daniel Graves Elected to MEAG Power Board

ATLANTA – July 27, 2026 – MEAG Power today announced that Elberton, Ga., Mayor R. Daniel Graves has been elected to the MEAG Power Board. Graves has been mayor of Elberton since 2022 and currently serves as a business development officer with Oconee State Bank, as well as maintaining a limited private legal practice.

Three members of the nine-member MEAG Power Board are elected each year at the MEAG Power Annual Meeting, which took place July 15. In addition to Mayor Graves, Acworth Alderman L. Timothy Houston, Sr., and Albany Commissioner Chad E. Warbington were elected to three-year terms on the Board. Crisp County Power Commission CEO Chris Hewitt was elected to a one-year term to fill the vacancy resulting from the retirement of Albany City Manager Terrell Jacobs from the Board after 14 years of service.

At the Board meeting in which Mayor Graves was seated, the existing Board officers were re-elected: L. Timothy Houston, Sr., Chairman; Patrick C. Bowie, Jr., Vice Chairman; and Eric S. Wilson, Secretary-Treasurer.

“I welcome Mayor Graves and look forward to working with him and the other leaders on the MEAG Power Board to fulfill our mission of delivering reliable, affordable power to our 49 Participant communities,” said MEAG Power President & CEO Jim Fuller.

About MEAG Power

The Municipal Electric Authority of Georgia (MEAG Power) is a nonprofit, statewide generation and transmission organization created by the Georgia General Assembly in 1975. MEAG Power provides reliable, competitive wholesale electricity to its 49 member communities (Participants), who own their local distribution systems, through take-or-pay contracts. The organization also monitors and advocates on energy issues at the state and federal levels on behalf of its Participants. Recognized as one of the leading joint action agencies in the country, MEAG Power is among the top public power companies nationwide in terms of annual net generation,

megawatt-hour sales and electric revenue. Its diverse, clean energy portfolio – delivering, on average, more than 65% emissions-free energy since 2016 – compares favorably with both the state and national averages.
